Address: Sansari Marga ,Bhanimandal,Lalitpur, 44700, Lalitpur, Nepal (Home)

● ABOUT ME

Hello, my name is Dipesh Karki. I am a Computer Applications graduate passionate about front-end development. I am developing my skills in JavaScript and React.js, creating interactive and user-friendly web projects. I am a quick learner, highly motivated, and player, eager to contribute to innovative tech solutions.

● EDUCATION AND TRAINING

22/10/2018 – 18/07/2022 Mahalaxmasthan, Lalitpur, Nepal

BACHELOR OF COMPUTER APPLICATION(BCA) Caribbean College of Management

Academic Projects

Airline Reservation System (4th Semester Project – PHP, MySQL)

- Created a basic airline reservation system with flight booking and passenger management features.
- Implemented database integration for storing booking details and generating reports.

E-Commerce Website (6th Semester Project – React.js, Tailwind CSS, Node.js, MySQL)

- Built a responsive e-commerce platform with product listing, cart, and checkout functionality.
- Used React.js for front-end UI, with REST API integration for product and order management.
- Applied dynamic state management for smooth user experience.

College Management System (8th Semester Final Project – Laravel, MySQL, Algorithm Implementation)

- Developed a full-featured Laravel-based system to manage students, courses, attendance, and staff.
- Designed admin and student dashboards with authentication, CRUD operations, and role-based access.
- Integrated algorithms to optimize data search, record management, and reporting.

● WORK EXPERIENCE

FULL-STACK DEVELOPER – ASTER INNOVATION PVT,LTD – 03/09/2025 – Current – LALITPUR, NEPAL

- Developed web applications using React.js, building responsive and dynamic user interfaces.
- Currently enhancing skills in React.js with hands-on project development.
- Learning and working with C# for backend development and application logic implementation.
- Built and maintained applications using ASP.NET MVC following proper architecture patterns.
- Designed and managed databases using SQL Server Management Studio (SSMS).
- Created and optimized tables, stored procedures, and functions for efficient data handling.
- Implemented basic CRUD operations and ensured smooth data flow between frontend and backend.
- Followed clean code practices and worked on improving application performance.
- Currently working on developing RESTful Web APIs using .NET / ASP.NET Web API for backend services integration.
- Testing and debugging APIs using Swagger & Postman to ensure proper endpoint functionality and response handling.
- Worked on SEMIS ERP frontend development, implementing responsive UI components and improving user experience.

- Currently working on the RMC project, handling both frontend development and API integration.
- Performed debugging, testing, and issue tracking for ICASH Payment Apps to ensure system stability and smooth functionality.
- Learning and understanding the workflow and business process implementation of the ICASH payment system.
- Working in an Agile development environment and following Software Development Life Cycle (SDLC) practices for project planning, development, testing, and deployment.

FRONT-END DEVELOPER & OPERATION MANAGER – BR CODEX PVT,LTD – 10/01/2023 – 03/11/2025 – LALITPUR, NEPAL

Address: Talchhikhel-15, Lalitpur, Nepal

- Developed responsive user interfaces using HTML, CSS, JavaScript, and React.js.
- Converted UI/UX designs into functional frontend components.
- Worked with reusable components, props, state, and basic hooks in React.
- Integrated frontend with backend APIs and handled form validations.
- Used MySQL for basic database operations such as data retrieval, insertion, and updates
- Fixed UI bugs, improved performance, and optimized layouts for different devices.
- Collaborated with senior developers and followed Agile development practices

CLUB IT ADMIN (FIFA CONNECT) – JAWALAKHEL YOUTH CLUB – 22/01/2023 – 08/06/2023 – LALITPUR, NEPAL

- Managed FIFA CONNECT registration system, ensuring accurate player and staff data entry.
- Maintained and updated club records, licenses, and player transfers in compliance with FIFA regulations.
- Coordinated with officials, coaches, and players to handle IT-related issues and data management.
- Supported digital operations of the club, improving efficiency in registration and reporting processes.

TECHNICAL SUPPORT / L1 (INTERN) – VIANET COMMUNICATION PVT,LTD – 06/05/2021 – 10/07/2022 – JAWALAKHEL,LALITPUR, NEPAL

- Assisted customers with internet connectivity issues, troubleshooting hardware and software-related problems.
- Provided first-level technical support through calls and tickets, ensuring timely issue resolution.
- Configured routers, modems, and networking devices under supervision.
- Documented customer queries, escalating unresolved cases to higher-level support.
- Gained practical experience in ISP operations, customer handling, and network troubleshooting

SKILLS

Languages

HTML5 | css | Bootstrap | JavaScript | React Js | TailWind | TypeScript | Figma | C-sharp C C++ | dotnet | Trello | Node js | Ssms | ASP.NET | Laravel | SQL | MySQL | PYTHON | Github | PHP | Canva | Version Control (Git) | Postman | RESTful api | PostgreSQL (Postgres) | SWAGGER | MongoDB, Mongoose | WordPress

PROJECTS

02/06/2026 – CURRENT

Nano Tools ai

NanoTools AI

AI-Powered Productivity Platform

NanoTools AI is a modern SaaS platform that provides a collection of AI-powered tools designed to help individuals, freelancers, students, and businesses complete everyday tasks faster and more efficiently. The platform offers a simple, user-friendly interface, allowing even non-technical users to access powerful AI features without any technical knowledge.

Key Features

- AI-powered content generation
- AI text rewriting and grammar correction
- Blog, email, and social media content creation
- Code generation and debugging assistance
- Image generation using AI

- PDF tools (merge, split, compress, convert)
- File conversion utilities
- QR Code Generator
- Password Generator
- URL Shortener
- AI Chat Assistant
- Secure user authentication and authorization
- Role-based access control (Admin & User)
- User dashboard for managing AI history and saved projects
- Subscription and payment integration
- Responsive design for desktop, tablet, and mobile devices

Security

- Secure authentication using JWT
- Password encryption
- Protected API routes
- Role-based authorization
- Secure file handling
- User data privacy and security

Goal

The goal of NanoTools AI is to provide an all-in-one platform where users can access multiple AI and productivity tools from a single dashboard, saving time and improving workflow without needing multiple websites or applications.

Technologies

- React.js
- Node.js
- Express.js
- MongoDB
- Redis
- JWT Authentication
- REST API
- AI API Integration
- HTML5
- CSS3
- JavaScript
- Git & GitHub

My Role

- Designed and developed the complete frontend and backend architecture.
- Built reusable React components and responsive user interfaces.
- Developed REST APIs with authentication and authorization.
- Integrated AI services for content generation and productivity tools.
- Implemented secure login, user management, and role-based access control.
- Optimized application performance and user experience.

02/06/2026 – CURRENT

Mero Ghar (Real Estatet)

Real Estate Management System

Tech Stack: React.js, Node.js, Express.js, MongoDB, JavaScript, JWT, REST API, HTML5, CSS3, Git

A full-stack real estate web application that enables users to buy, sell, and rent properties through a modern and responsive platform. The system provides secure authentication, role-based access control, advanced property search, and an intuitive dashboard for property management.

Key Contributions:

- Developed a responsive frontend using React.js with reusable and modular components.
- Built secure RESTful APIs using Node.js and Express.js.
- Implemented JWT-based authentication and role-based authorization for Admin, Agent, and Customer roles.
- Designed and integrated MongoDB databases for efficient property and user management.
- Developed advanced property search and filtering by location, price, property type, and amenities.
- Created dashboards for property management, user management, and inquiry handling.
- Integrated image upload functionality for property listings.
- Applied responsive design principles to ensure compatibility across desktop, tablet, and mobile devices.
- Followed clean code practices, API integration, and Git version control throughout the development process.

● TECHNICAL SKILLS

Frontend

- HTML5: semantic tags, forms, accessibility basics.
- CSS3: layouts (Flexbox, Grid), media queries, responsive design.

- JavaScript (ES6+): variables, loops, functions, DOM manipulation, events.
- Frontend Framework/Library (ReactJS)
- Understanding of components, props/state, and basic hooks (for React).

Version Control:

Git basics: clone, branch, commit, push/pull, merge.

GitHub/GitLab usage for collaboration.

- Styling & UI Libraries: Familiarity with frameworks like Bootstrap, Tailwind, Material UI.

Basic Tooling:

- Package managers (npm/yarn/pnpm).
- Build tools (Webpack/Vite basics).
- Browser DevTools debugging.

API Consumption:

- Fetch/Axios for calling REST APIs.
- Understanding of JSON data handling.

● **PAYPARK MOBILE APP**

BR Codex Pvt Ltd

Tools & Design (*Team Project – Figma / Kotlin*)

- **Figma:** UI/UX design for mobile apps, wireframes, prototypes, interactive layouts.
- **Collaboration:** Worked with a development team (BR Codex) on the PayPark mobile app; contributed to design in figma while the development was done in Kotlin.
- **Kotlin (basic understanding):** Exposure to mobile app development workflow alongside the team.

● **CMS**

MERN-Stack project

Kidland School Website & CMS — MERN Stack

- Re-engineered the existing WordPress/PHP school website into a modern full-stack application using MongoDB, Express.js, React.js, and Node.js (MERN).
- Developed a responsive school website with sections for Home, About, Academics, Admissions, News & Events, Gallery, and Contact.
- Built a custom Content Management System (CMS) that allows administrators to manage and update website content without modifying the source code.
- Implemented CMS functionality for managing news, events, gallery images, academic information, admissions content, and other dynamic website data.
- Developed secure admin functionality and RESTful APIs for communication between the React frontend and Node.js/Express backend.
- Integrated MongoDB for efficient storage and management of dynamic school content.
- Created reusable React components and responsive layouts to ensure a consistent experience across desktop, tablet, and mobile devices.
- Independently managed the complete project lifecycle, including UI/UX development, frontend, backend, CMS, database integration, API development, testing, debugging, and deployment.
- Successfully transformed a traditional WordPress-based website into a scalable, maintainable, and customizable MERN-based school platform.
